

## EBCx Services

has over 40 years of experience making buildings operate comfortably, safely and energy efficiently.

Our business started as a family owned mechanical contractor in Miami, FL, founded by Cal Gordon in 1958.

Scott Gordon, Cal's son, started working in the business in 1973. With over four decades of experience in the mechanical contracting, controls, engineering and energy services industries; Scott established EBCx Services in 2016.

EBCx Services provides training and consulting to the Mechanical Services Industry. EBCx Services specializes in assisting contractors with expanding their business into technical services including Energy Audits, Commissioning Services, Testing/Adjusting & Balancing (TAB), IAQ Investigations and developing Energy Retrofit Projects.

### **CILB Continuing Education Requirements**

Florida's Construction Industry Licensing Board (CILB) requires all Registered and Certified Air Conditioning and Mechanical Contractors to complete 14 hours of board approved continuing education. CILB requires 9 hours of general industry specific training, plus 1 hour each of: business practice, workers compensation, workplace safety, laws/ rules and advanced module.

EBCx Services provides technical training on mechanical related subjects that are approved by Florida CILB under the General Industry Specific Category.

Additionally, EBCx Services offers training for contractors' key employees who will also benefit from industry specific specialized training.

Please visit our website for CILB approved courses and current scheduled training.

## Turn Training Time into Opportunity that Grows Your Business

Training should provide useful knowledge that returns to your company with the goal of making a positive impact on your organization and its bottom line.

**EBCx Services training is developed by contractors for contractors.** Our training is developed and presented by contractors with real world experience, providing a structured path to help contractors add valuable technical services to their business. Additionally, our training is developed around using the many transferable skills that contractors and technical professionals already possess.

Both contractors and their key employees such as: Project Managers, Service Managers, Estimators, Account Executives and Lead Service Technicians will all benefit from the specialized training offered by EBCx Services.

**Florida Contractors are required by the Construction Industry Licensing Board (CILB) to have 14 hours of Continuing Education Credits every two years.**

**EBCx Services provides CILB Approved Training on topics specifically designed for HVAC and Mechanical Contractors. Training that helps generate greater revenue and profits for your companies.**

**Turn your training hours into an investment that pays dividends for years to come.**

**EBCx Services brings decades of experience into a formal classroom learning environment.**

## Why EBCx Services?

EBCx Services understands that time spent on training takes precious time away from your business. We strive to provide every training experience that adds value.

EBCx Services provides technical training and consulting to help contractors and their key employees in the following main areas:

- Commissioning Services
- Energy Auditing
- Developing and Selling Energy Retrofit Projects
- Testing/Adjusting/Balancing (TAB)
- Control System Retuning
- IAQ Investigations

We roll up our sleeves and provide high quality training specifically for the Mechanical Services Industry.

Our training approach utilizes decades of real-world experience and consolidates it into training that provides value to the Mechanical Services Industry.

Our goal is to help

mechanical service professionals leverage transferable skills and resources that expand their technical service offerings. Offerings that add value to your customers and generate revenue and profits for your company.
